■ **Overview**

The launch of the affordable CD-P1260MKII continues TEAC's long tradition of great-sounding CD players. It plays MP3 and WMA-encoded discs as well as standard CDs, allowing hours of playback from a single disc.

A newly-developed CD Drive, positioned at the center of the unit (for perfect weight distribution), reads data from the discs at high-speed while a D/A Converter from Wolfson, capable of 8-times over-sampling, delivers a richly textured sound. The front panel buttons allow the user to navigate through any subfolders to find their music. A fully-featured wireless remote control is included. For great-sounding, reliable CD playback on a budget, TEAC's CD-P1260MKII is the natural choice.

● New Fast Reading CD Drive

The CD-P1260MKII employs a new CD Drive that supports High-speed Data Reading, much faster than is achieved by conventional ESP (Electric Shock-proof) CD Drives.

● Center-mounted Mechanism

The CD drive is positioned at the center of the unit which gives perfect weight distribution while minimizing vibration and resonance during playback.

● MP3/WMA Playback

The CD-P1260MKII supports both MP3 and WMA files recorded to CD-R/RW discs, displaying data such as artist, album, and track names. It is also capable of playing back discs containing music organized in folders. Search mode makes it easier to find and select a track on discs containing numerous tracks (supports alphanumeric characters only.)

● Various Playback Modes

Program playback (up to 64 tracks), shuffle playback, repeat playback (single/all/programmed tracks/A-B repeat) and intro playback (plays back the first 10 seconds of each track) are all supported.
